

JUBIL

**Excellence is an elusive quality.  
So easy to recognize  
and so difficult to attain.  
JBL craftsmen have been involved  
in the art of sound  
for more than a generation —  
signal and source, wood and fabric,  
transducers and acoustics, all of it.  
After all these years  
they seem to have developed  
a knack for excellence.  
Today these craftsmen continue  
to perform to the most rigid  
standards any craftsmen can submit to:  
those they impose upon themselves.**

**JBL**

The ultimate in acoustical perfection and artistic grandeur, the Paragon is a complete stereophonic loudspeaker system capable of providing sound reproduction equalled only by the live performance itself. Flawlessly finished in oiled walnut, it utilizes a unique acoustical principle to create an exceptionally wide stereo sound stage. The Paragon contains two 15" low frequency loudspeakers, two massive compression drivers, two specially engineered horns, two high frequency radiators and four matched dividing networks. 36" x 104" x 24" deep.

Paragon

Enhanced by delicate hand-carved fretwork, Olympus loudspeaker enclosures and optional matching Delphi equipment cabinet form a striking oiled walnut ensemble.

Two loudspeaker systems are available: the S7R, with a 15" low frequency loudspeaker and 15" passive radiator, plus a compression driver; or the S8R, utilizing the same low frequency units as the S7R, but incorporating a more massive compression driver and a high frequency ring radiator. Delphi equipment cabinet: 27" x 65" x 20" deep. Olympus enclosure: 27" x 40" x 20" deep.

Olympus Ensemble

## Sovereign Ensemble

A gracious integration of select woods and pleated fabric. The Sovereign enclosure and optional matching equipment cabinet are available in Country Oak or Golden Oak finishes. Loudspeaker systems are identical to those available in the Olympus. Sovereign III equipment cabinet: 27" x 65" x 20" deep. Sovereign I loudspeaker enclosure: 27" x 40" x 20" deep.

Contemporary in feeling, but deliberately understated to enhance any listening environment. The Flair presents a handsome silhouette when placed vertically or horizontally, and is furnished with a distinctive sculptured foam and fabric grille. Accurate reproduction from a 15" low frequency loudspeaker and horn loaded compression driver. 22" x 30" x 18" deep, plus 2" for base.

Flair 45 Lancer 101

Distinctively styled. Oiled walnut side panels and imported Adriatic marble top are perfectly accented by a hand-carved wood fretwork grille. Full-bodied sound from a 14" low frequency loudspeaker, precision compression driver and horn/lens. 25" x 18" x 13" deep.

## Lancer 55

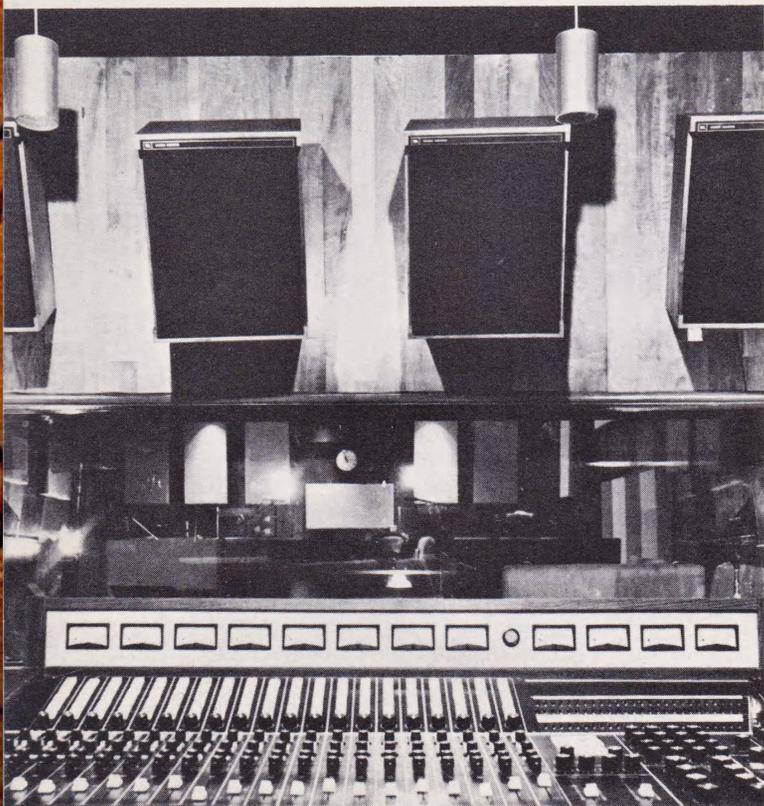

JBL's most economical floor system exquisitely scaled for today's smaller living spaces. Useful as an end table, the Lancer 55 offers a sparkling smoked glass top and a unique three-dimensional grille available in several decorator colors. Shown are Indigo, Mandarin and Coffee. Distinctive, dramatic sound from a 14" low frequency loudspeaker and 2" high frequency direct radiator. 25" x 18" x 13" deep.

The Studio Master represents a visual refinement of the classic JBL Studio Monitor. Its gracefully tapered form, three-dimensional grille and rich oiled walnut enclosure create a striking contemporary design of quiet elegance. The acoustic system consists of a 15" low frequency loudspeaker and high frequency compression driver. Crenelex pattern Sculptured Air grille available in Smoke, Raven, Aegean or Burgundy. 33" x 24" x 21" deep.

Studio Master L200

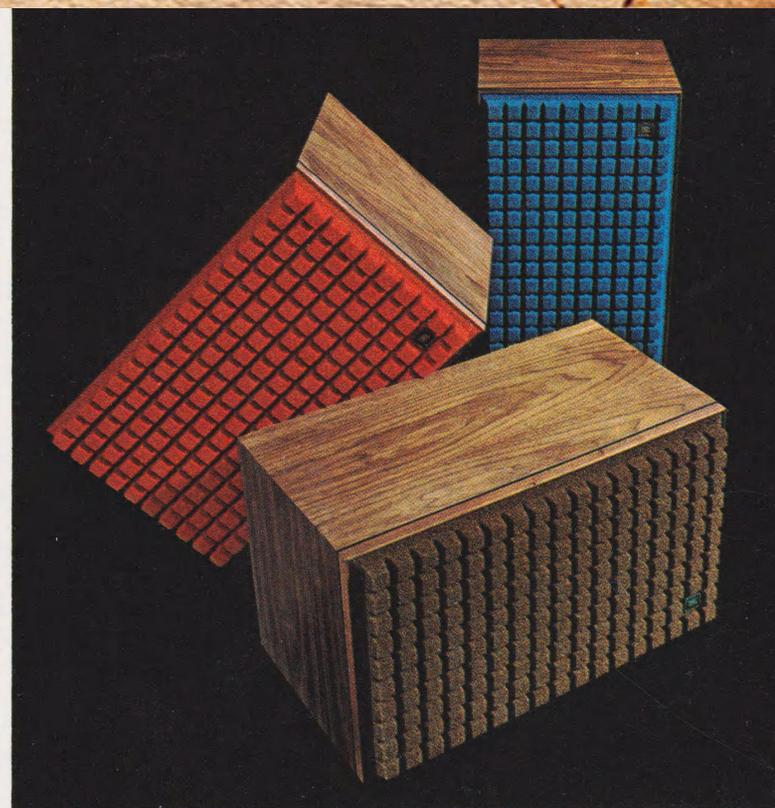

The monitor loudspeaker is the standard by which recordings are judged—from initial microphone placement through mixing, dubdown and on to final mastering. Modern recording techniques place unprecedented demands on the loudspeaker. It must exhibit smooth frequency response throughout the entire audio spectrum, be able to handle massive amounts of power and have the capacity to reproduce the explosive wavefronts characteristic of amplified musical instruments without distortion.

JBL's reputation for building the ultimate in loudspeakers prompted requests from audio engineers for both a large monitor system to be used in recording studios and a compact version for use in crowded control rooms where multi-channel techniques require a separate loudspeaker for each track. After exhaustive experimentation and testing, JBL introduced two new professional monitors which quickly won acceptance as reference standards throughout the recording industry. This extraordinary technical success inevitably led to the demand that they be made available for home use. In bringing truly professional performance to the living room the only change made by JBL was to insure, through refined visual design, that each of these remarkable systems would prove a handsome addition to any listening environment.

Century L100

Almost immediately after being offered as a consumer product, JBL's Century established itself as a runaway best seller. Exciting performance and bold, imaginative design have brought the L100 to an unchallenged position as the leader in the bookshelf field. The oiled walnut enclosure houses the same precision components found in the JBL control monitor—a 12" low frequency loudspeaker, 5" midrange reproducer and 2" high frequency direct radiator. The unique Sculptured Air grille is furnished in the provocative Quadrex 2 pattern in Ultra Blue, Burnt Orange and Russet Brown. 14" x 24" x 14" deep.

The timeless beauty of the Mediterranean: Verona. Finely detailed, handsomely finished, this traditional enclosure is fashioned of lustrous pecan accented by a rich brocaded grille fabric. Its robust sound will provide the realism of a concert hall. The acoustical system combines a 14" low frequency loudspeaker and matching passive radiator, 5" midrange reproducer and 2" high frequency direct radiator. 28" x 37" x 18" deep.

Verona L71

An acoustical space-saver. Behind the latticed Minuet grille, an 8" full-range loudspeaker is paired with an 8" passive radiator. Powerful performance cutomarily associated with systems many times its size. Finished in oiled walnut. 9" x 17" x 8" deep.

Minuet L75

Lancer 44

Attractively proportioned compact loudspeaker system in hand-rubbed oiled walnut. An 8" full-range loudspeaker and 8" passive radiator effortlessly reproduce the most complex musical passages. 13" x 24" x 12" deep.

Lancer 77

A sophisticated bookshelf loudspeaker system finished in oiled walnut. A 10" low frequency loudspeaker and 10" passive radiator deliver robust bass. Silky smooth high frequency response from a 2" direct radiator. 14" x 24" x 12" deep.

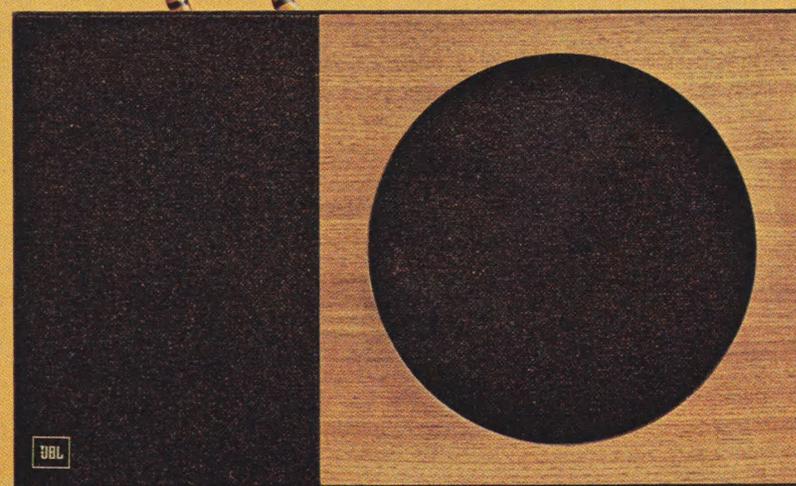

Finished in oiled walnut, the Cortina features the sophisticated design statement of a clean, unframed charcoal brown fabric grille. A 12" low frequency loudspeaker and a 2" direct radiator are precisely matched for dynamic overall sound quality. 14" x 24" x 12" deep.

Cortina 88-1

Identical to the 88-1 in acoustical design, the Nova offers a provocative geometric grille of oiled walnut and charcoal brown decorator fabric. 14" x 24" x 12" deep.

Nova 88

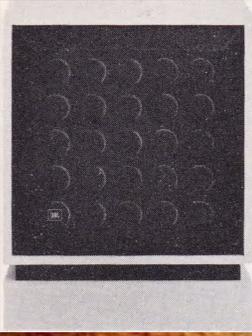

Accurate, well defined performance at background levels or concert hall volume. Combines a 14" low frequency loudspeaker—the largest used in a bookshelf system—and a 2" high frequency direct radiator. Finished in oiled walnut with a handsome fabric grille. 14" x 24" x 12" deep.

Athena SC99

Athena S99

Identical to the SC99 in internal componentry and performance, with a hand-carved wood fretwork grille for an added touch of luxury.

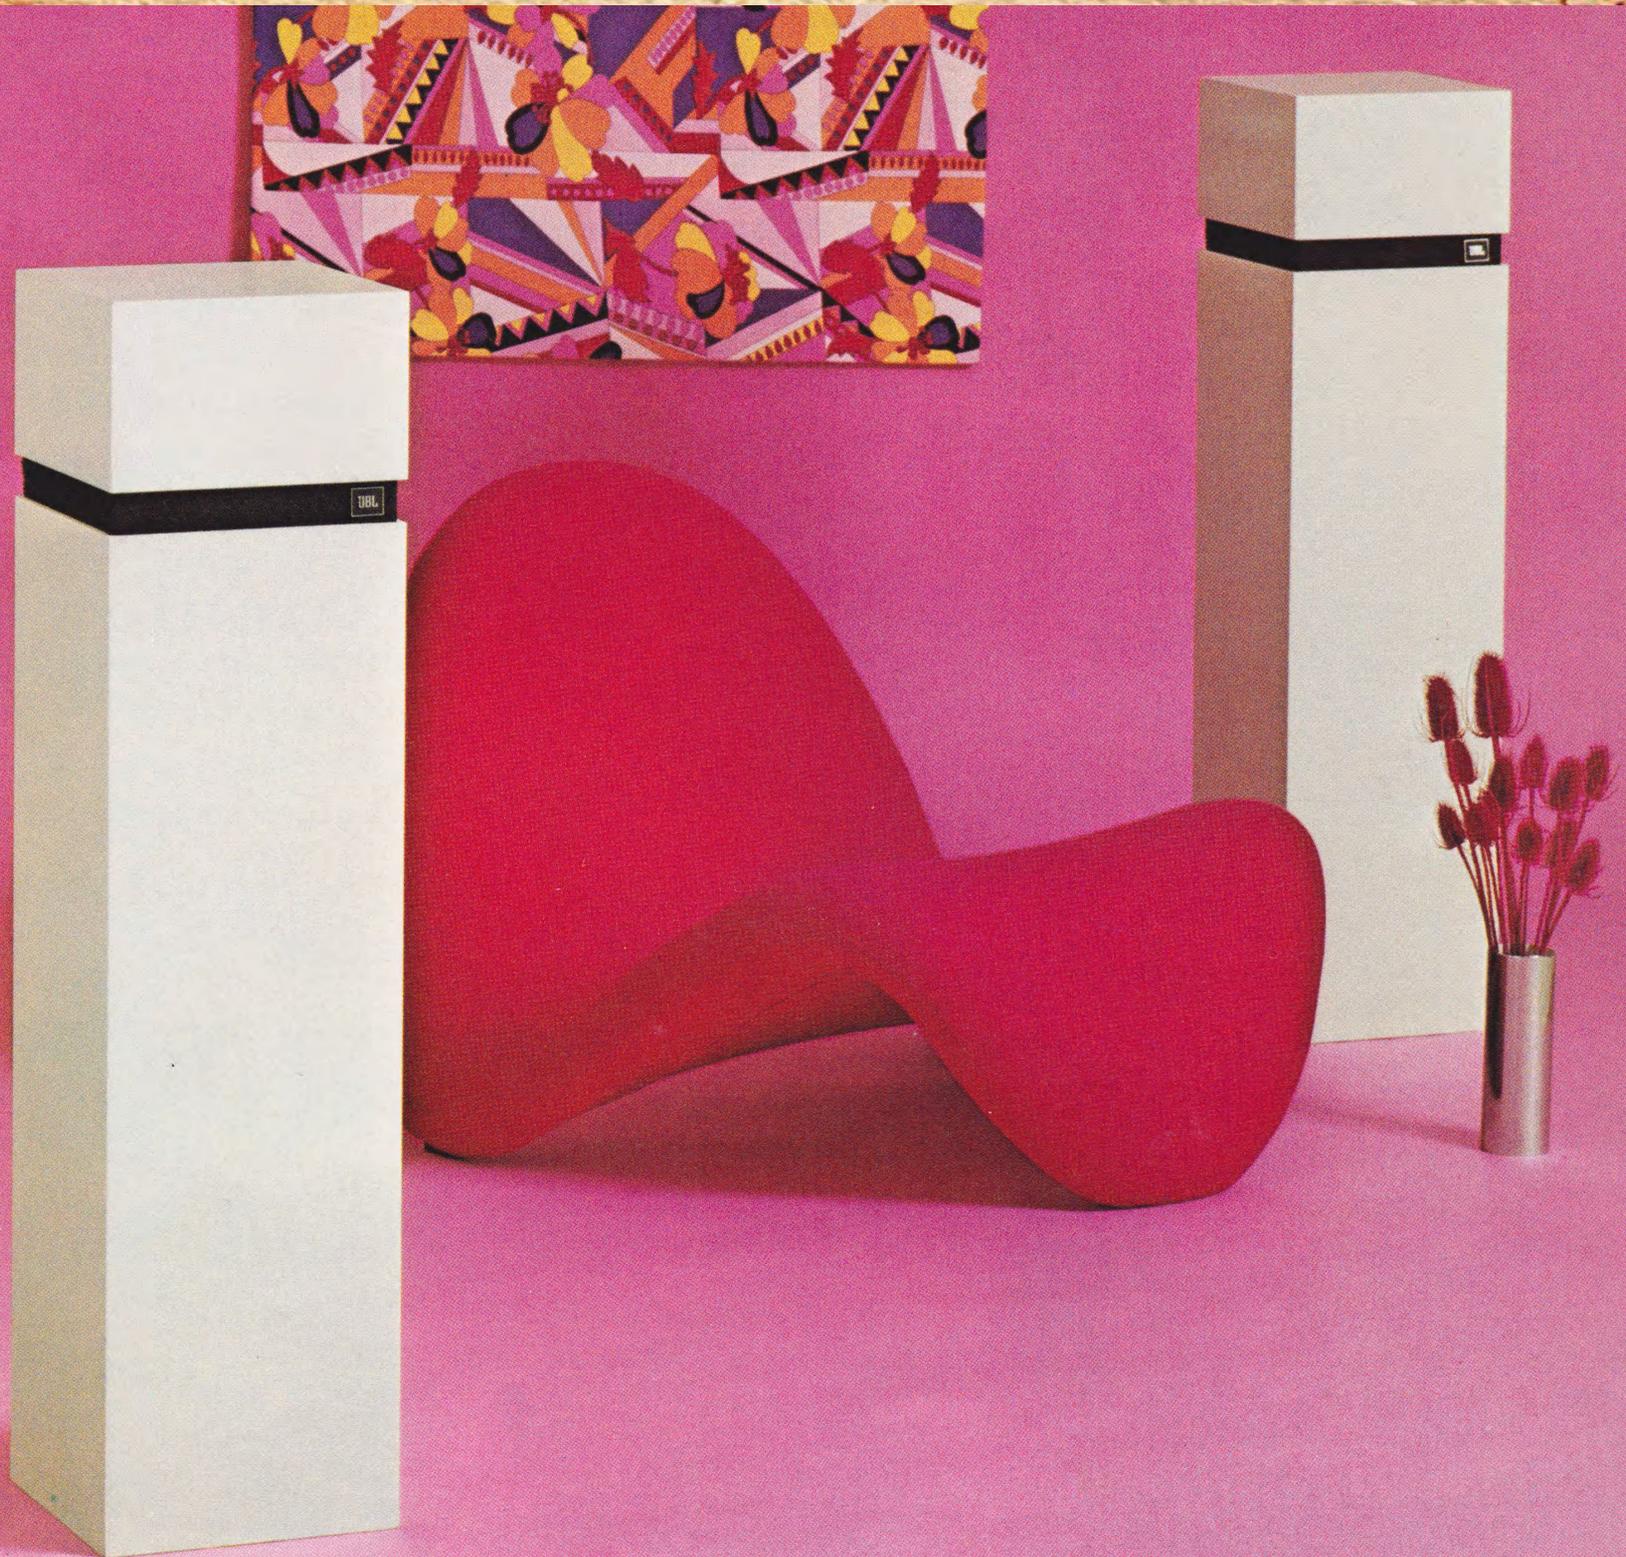

Designed to be used on a standard bookshelf or as a floor system with optional matching base. Finished in oiled walnut or satin white, the Aquarius 1 is distinctively accented by a textured contour-molded grille assembly. A 10" bass loudspeaker, 5" midrange reproducer and 2" high frequency direct radiator are combined with front-mounted dispersive elements to project an unusually diffuse sound pattern. 20" x 20" x 14" deep. Optional base: 5V2" high.

Aquarius 1

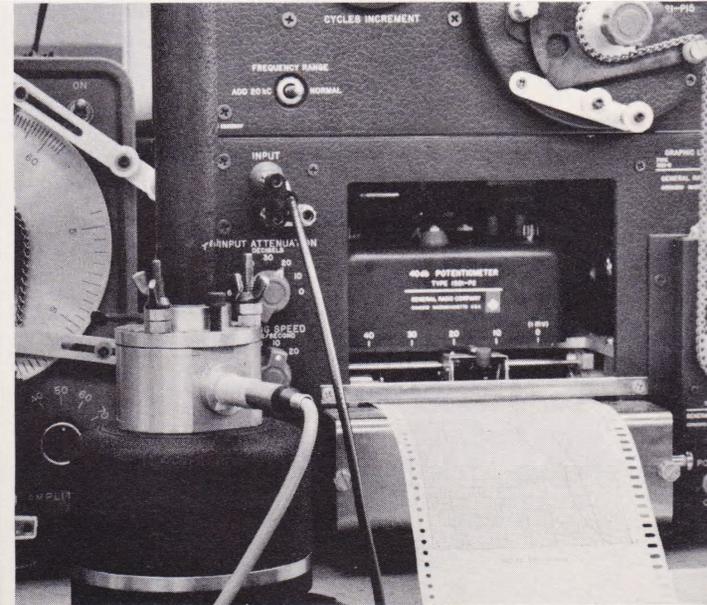

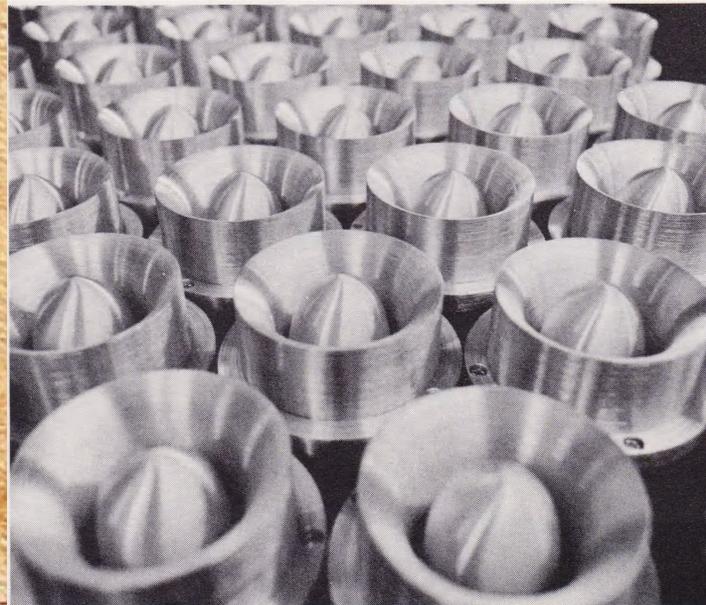

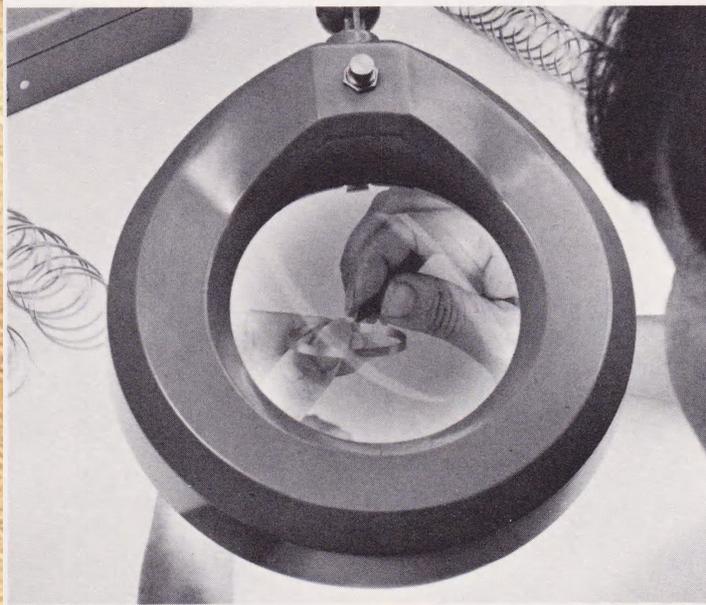

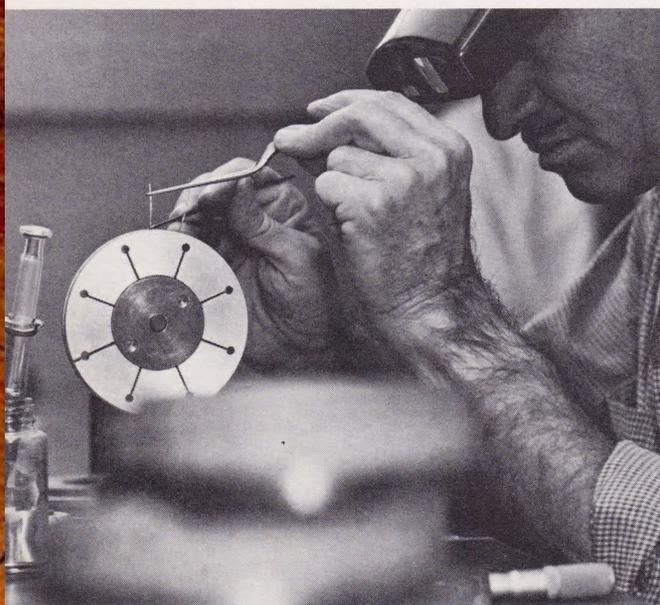

## Aquarius 4

The clean, unencumbered styling and exciting performance of the Aquarius 4 make it an ideal choice for those who desire musical reproduction without compromise in a limited space and with maximum freedom of placement. Available in oiled walnut or satin white, the Aquarius 4 uses an 8" low frequency loudspeaker and a 2" high frequency driver to achieve its warm, spacious sound quality. 40" x 10" x 10" deep.
