

JVC VS-5351

JVC VS-5351

The JVC's 4-way, 5 speaker acoustic suspension speaker system. And up until now the kind of quality, power and sound you get from it was only found in sound studios and concert halls. Now JVC's put it into a speaker you can use in your home.

Besides the powerful 100 watts (peak power) this speaker is capable of handling, there are a lot of other features that make it the most advanced speaker for home use on the market. To begin

with, we've incorporated in it's 15" free-edge woofer a substantially larger magnet to achieve rich, heavy bass sounds. And we've added seven conical cones to avoid "divided vibrations" and provide strong reinforcement. A cellular horn unusual in a home speaker provides more crisp sound in the mid ranges.

This speaker is also perfect for anyone interested in setting up a multi-amplifier stereo system. Its multichannel input terminals permit you to hook up three separate power amplifiers, one to the woofers, one to the mid ranges and one to the tweeters. We've also incorporated in it dual controls for both the middle and high frequency ranges. They're conveniently positioned on the front grille so there's no awkward reaching around behind your speaker to make any adjustments you want.

The whole system is enclosed in a walnut case specially constructed so there are no nails or screws to vibrate loose.

Because this speaker is so new and sophisticated we've only been able to produce it in a limited quantity.

There are just 250 pairs available this year. Owning a set means you'll be able to enjoy the most advanced home stereo sound available.

And there are only 249 other people who'll be able to say that.
