

# THE DREAM COMPONENTS

A tape deck that thinks, a turntable steady as a rock, a receiver that protects itself, and more.

In your dream you hear beautiful music coming from a high fidelity system. All the components have the same name on them.

Impossible? Only if you believe there's one "best" maker for each type of component. Once, perhaps. But today no one has a monopoly on technological excellence. You'll find the Optonica name on entire systems of the world's most advanced components, with innovations—our own

new circuits and features—you might expect to find only in a dream.

In a dream you might own the amazing Optonica cassette deck that contains a small computer. You can program it to control endless recording and playback functions. It would be a fantastic deck even without its own computer.

In the same dream you could have the Optonica turntable with a beautiful base that looks and feels

just like granite. It is, in fact, mikage granite, which will transmit exactly the correct amount of vibration to the tone arm: *none*

You might furnish your dream with a new Optonica receiver or separates, the only ones in the world built with aircheck calibration. Opto-lock tuning, triple power supply; designs, and three protection circuits.

Now the same source also produces some of the most accurate speaker systems in

history Optonica CP-5151's incorporate a unique new tweeter. It weighs just about 1/50th as much as a comparable "dome"-type tweeter, and its sound is incomparable.

Listen to a system with one name: a dream system, only at an Optonica dealer
