

You can forget
all about CMOS memories, tachometer
speed regulation, free-floating sub-chassis,
low torsion tone arms etc., etc...

Just remember-Philips.

PHILIPS

* They do? Then here are some interesting specification figures:

- Wow and flutter ≤ 0.025 WRMS
- Rumble ≤ -73 dB (DIN B)
- Tone arm resonance 10Hz
- Tracking error ≤ 0.9 '/cm.

And you can get a fully detailed leaflet by simply calling in at your nearest Philips dealer.

The whole point of an automatic HiFi record deck is that it should combine complete operating convenience with uncompromising high fidelity. The techniques that make this possible - like direct control turntable drive, touchbar operation and LED direct speed readout with high-resolution pitch control, may not interest you very much.* After all, it's results that count.

But you can take it from us that we have built all these techniques - and a lot more besides - into the AF 829. To create a front-operated record deck that puts superlative HiFi performance at one single fingertip.

Philips HiFi:
tomorrow's HiFi.
