

The luxury receiver with a difference: Dolby.*

Sansui's new 9090DB top-of-the-line receiver adds Dolby to its other luxury credentials - big power, an extremely fine tuner section and great versatility. The Dolby circuitry will not only decode Dolby FM broadcasts: it can also encode and decode tape

recordings for reduced noise and hiss.

And, of course, with the Sansui 9090DB you can creatively determine just how you like your music. In addition to bass and treble controls, with turnover selectors for 150 Hz/300 Hz and 15 kHz/3 kHz respectively,

there is also a midrange control. High and low filters. A tone defeat for bass and treble. A loudness switch and 20 dB audio muting switch. For added creative freedom, two tape monitors and a mic mixing circuit with separate level control. Two tuning meters.

as well as twin power meters that also serve for Dolby tone calibration.

Listen to the 9090DB. Handle its superbly smooth controls. See how they respond to your slightest command. We know you will fall in love with Sansui.

The Sansui 9090DB.

AUDIO SECTION

POWER OUTPUT

125 watts per channel, mm. RMS, both channels driven into 8 ohms from 20 Hz to 20,000 Hz, with no more than 0.1% total harmonic distortion.
