

SP150/70/50

Highly linear compact boxes

New components and modern manufacturing methods make it possible to manufacture these excellent, highly linear, compact loudspeakers. Their high load capacity of up to 40 watts, the excellent efficiency and their wholes of balanced sound make these boxes versatile. These boxes are also based on the tried and tested Sansui

Bass reflex system built and equipped with Sansui's quality frequency switch. All boxes are made of finely grained walnut veneer and have Sansui's traditional Kumiko grill as a front cover. These boxes are also ideal for any hi-fi stereo system

Rear speakers in Quadro systems are recommended.
