

A tuner and an amplifier should be mated somewhat more carefully than a husband and wife.

Marry a tuner with an amplifier,
and you have not only a receiver,
but a union that's truly indissoluble.
It had better be a good one.

For to join a fantastic tuner with a
lesser amplifier, or a sensational
amplifier with a tuner that's merely
great, is to invite unhappiness. But
match two equals, and they can
make beautiful music together—as
they must, to live in happy harmony
with you.

That's why the Sony STR-7065
receiver is a perfect mating. Its tuner
has the sensitivity to reach out for
signals from even the most distant
fringe locations, yet has discrimina-
tion enough (70dB IHF selectivity,
1dB capture ratio) to pluck one sig-
nal clearly from a crowded band,

And the 7065's direct-coupled
amplifier brings to this union the
strength of 60+60 RMS watts from
20Hz to 20kHz at 8 ohms with less
than 0.2% distortion). Versatile con-
trols offer a choice of three speaker
pairs, mic mixing and dual tape
monitors. Switchable preamp-out/
amplifier in connections permit in-
dependent use of each section and
addition of accessories.

Such a happy union should spar-
kle visibly as well as musically. And
the 7065 does, with lights that tell
which of its many functions are in
use and dual tuning meters

The Sony 7065, at \$499.50* is our
top of-the-line receiver. For those who
feel a union can survive with lower
luxuries (no indicator lights, signal
Strength meter or mic-mixing control),
we offer the Sony STR-7055. It has
35+35W RMS. 20Hz to 20kHz at 8
ohms with 0.2% THD. At
\$399.50; it's an equally well-mated
receiver. Sony Corporation of
America. 9 West 57th St.,
New York. N.Y. 10019.
